

Wireless USB Adapter

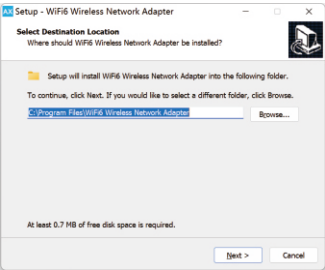

Quick Installation Guide

WiFi driver After installation

1 Wireless Adapter WiFi Driver Installation

1.1 This installation method uses win10 system as an example,open the corresponding driver folder,double-click WiFi6 Adapter Setup----->USB----->WiFi-----and find the “AX3000 WIN WiFi setup.exe” to run the installation program,and the installation can be completed.(Note: if the installation file is a compressed package,you need to decompress it to install)

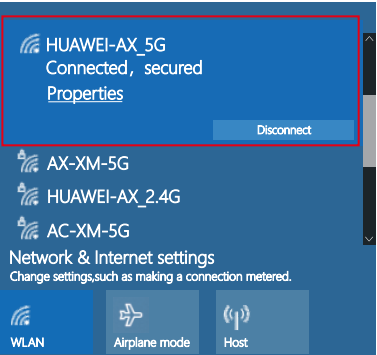

1.2 How to connet the USB Adapter to Wi-Fi?

01. Ope the Internet icon or at the lower right corner of computer.

02. Searching and connecting the Wi-Fi you preferred on the detected Wi-Fi list, and then enter the Wi-Fi password to connect.

03. Finally you are connected to the Wi-Fi.

Q2: What should we do if there are two WiFi drivers with the same name, and one of them displays an exclamation mark?

A2:Please follow the steps below to uninstall(win10)
This computer(right click)-->Manage-->Network adapters
-->MediaTek Wi-Fi 6/6E Wireless USB LAN Card(right click)
-->Uninstall device.
